

## *Archaeological Method*

### **Archaeological Method**

Archaeology, or archeology, is the study of human activity through the recovery and analysis of material culture. The archaeological record consists of artifacts, architecture, biofacts or ecofacts and cultural landscapes. Archaeology can be considered both a social science and a branch of the humanities. In North America archaeology is a sub-field of anthropology, while in Europe it is often ...

The archaeological record is the body of physical (not written) evidence about the past. It is one of the core concepts in archaeology, the academic discipline concerned with documenting and interpreting the archaeological record. Archaeological theory is used to interpret the archaeological record for a better understanding of human cultures. The archaeological record can consist of the ...

While excavating a 3,600-year-old palace in the once-great city of Avaris, Egypt, a team of archaeologists (after, presumably, fending off no fewer than three vengeful mummies and losing half their team to flesh-hungry scarabs) unearthed four pits. Now, we've already established in previous articles that ancient pits are often wells of unspeakable stuff best left to fade into history with their ...
