

Mcgraw Hill National Electrical Code 2011 27th Edition

Mcgraw Hill National Electrical Code

The National Electrical Safety Code (NESC) or ANSI Standard C2 is a United States standard of the safe installation, operation, and maintenance of electric power and communication utility systems including power substations, power and communication overhead lines, and power and communication underground lines. It is published by the Institute of Electrical and Electronics Engineers (IEEE).

Programming should begin with a clear definition of the activities to be performed and the people who will use the space and surroundings. Accounting for functional and psychological needs is a primary purpose of the planning process that defines an owner's functional and physical requirements for each spatial element in a building or facility. This process seeks to:
