

## *Multidimensional Databases Problems And Solutions*

### **Multidimensional Databases Problems And Solutions**

Multidimensional Databases: Problems and Solutions, strives to be the point of reference for the most important issues in the field of multidimensional databases. This book provides a brief history of the field and distinguishes between what is new in recent research and what is merely a renaming of old concepts.

### **Multidimensional Databases: Problems and Solutions ...**

Multidimensional Databases: Problems and Solutions , strives to be the point of reference for the most important issues in the field of multidimensional databases. This book provides a brief history of the field and distinguishes between what is new in recent research and what is merely a renaming of old concepts.

Of course, the summary database can be represented as a table (a relation), such as [salary-info (age, sex, projectID, average-salary)], but the semantics are then lost. The main concept of summary databases is to capture the multidimensional space and the dependency of the summary measure on that space.

Additional resources for Multidimensional Databases: Problems and Solutions. Sample text. This is quite important when, for example, different category attributes linked to the primitive attribute have different names. For example, in one MADS the category attribute year appears and in another MADS the category attribute years appears.
