Note to readers of the NCO User Guide in HTML format: The NCO User Guide in PDF format (also on SourceForge) contains the complete NCO documentation. This HTML documentation is equivalent except it refers you to the printed (i.e., DVI, PostScript, and PDF) documentation for description of complex mathematical expressions.

In mathematics, low-rank approximation is a minimization problem, in which the cost function measures the fit between a given matrix (the data) and an approximating matrix (the optimization variable), subject to a constraint that the approximating matrix has reduced rank. The problem is used for mathematical modeling and data compression. The rank constraint is related to a constraint on the ...

For problem P2. We need to be a set of functions of . In the figure on the right, we have illustrated a triangulation of a 15 sided polygonal region in the plane (below), and a piecewise linear function (above, in color) of this polygon which is linear on each triangle of the triangulation; the space would consist of functions that are linear on each triangle of the chosen triangulation.

Crysis Tweak Guide [Page 11] Advanced Tweaking (Pt.4) Graphics Commands (Cont.) Shadow Effects. e\_shadows [0,1] - Turns all shadows on or off, and if disabled, can provide a large boost in FPS at the cost of realism. e\_shadows\_cast\_view\_dist\_ratio [value] - This setting controls the distance to which you can view shadows cast from most objects. The lower the setting, the less objects will cast ...

Java plugins for ImageJ and Icy Plugins for Icy. Active Cells. This is a plug-in for Icy that implements fast active contours for image segmentation. Their representation in terms of spline curves allows for a natural and intuitive manipulation of the active contour through control points.
