In philosophy, systems theory, science, and art, emergence occurs when an entity is observed to have properties its parts do not have on their own. These properties or behaviors emerge only when the parts interact in a wider whole. For example, smooth forward motion emerges when a bicycle and its rider interoperate, but neither part can produce the behavior on their own.

Affordance is what the environment offers the individual. James J. Gibson, coined the term in his 1966 book, *The Senses Considered as Perceptual Systems*, and it occurs in many of his earlier essays (e.g.). However, his best-known definition is taken from his seminal 1979 book, *The Ecological Approach to Visual Perception*: The affordances of the environment are what it offers the animal, what it ...
