An experiment was conducted to investigate the various conditions under which political expertise (or prior knowledge in the general political domain) and affect (positive or negative feelings) might interact with each other in shaping the cognitive strategies that people employ in forming reactions to newspaper stories. Two hundred six subjects from a major midwestern university were randomly ...

Political Expertise and Affect: Effects on News Processing ...

Abstract. This study examines how news frames in campaign coverage affect individuals' interpretation of campaigns. Framing effects are conceptualized in terms of the process by which textual features in news stories set limits on knowledge use in the construction of a discourse model—a mental model constructed through the interaction between news frames and the interpreter's social knowledge.

Strategy and Issue Frames in Election Campaign Coverage: A ...

Abstract. Three experiments investigated the role of stereotypic and nonstereotypic criteria in judgments of political candidates. The effects of physical attractiveness, political party, and stands on specific issues on both absolute and comparative judgments of political candidates were examined to evaluate three hypotheses about stereotype and attribute use.
