Urban vs. Rural Sustainability. By Toby Hemenway, originally published by Permaculture Activist ... This is not the place to go deeply into the question of whether cities are more sustainable than contemporary American country life, but at each point where I delve into the issues, I find suggestions that urbanites have a smaller ecological ...

Urban vs. Rural Sustainability - Resilience

* This publication may serve as a guide to the video, Sustainability in Urban Ecosystems. A Sustainable Landscape. A sustainable landscape is defined as a site where native and introduced plants are well suited to the existing light, moisture, and soil conditions, and require low inputs of labor, fertilizers, herbicides, insecticides, and ...

Sustainability in Urban Ecosystems - CUES

In addition, the interdependencies and interactions between each system and between the urban ecosystem as a whole and other ecosystems need to be understood. Unhealthy urban ecosystems can lead to local and wider environmental degradation, social problems, economic decline, human health problems and further disconnection from nature.

Sustainability Concepts: Urban Ecosystems

How do rural-urban relations affect our natural resources? Ecosystems provide a wide variety of goods and services such as renewable energy, air and water purification, and climate change mitigation and adaptation. Urbanisation trends impact upon land use and therefore on the

availability, accessibility and quality of ecosystem goods and services.
