Several variants of Zeno's dichotomy paradox are considered, with the objective of exploring the logical foundations of physics. It is shown that Zeno's dichotomy paradox leads to contradictions at the metamathematical (as opposed to formal) level in the basic classical infinitary reasoning that is routinely used in theoretical physics.

This exciting and pioneering new overview of multiagent systems offers a computer science perspective, and also integrates ideas from operations research, game theory, economics, logic, philosophy and linguistics. The authors emphasize foundations to create a broad and rigorous treatment of their subject, with thorough presentations of distributed problem solving, game theory, multiagent ...

Logical consequence (also entailment) is a fundamental concept in logic, which describes the relationship between statements that hold true when one statement logically follows from one or more statements. A valid logical argument is one in which the conclusion is entailed by the premises, because the conclusion is the consequence of the premises. The philosophical analysis of logical ...

Foundations of mathematics is the study of the philosophical and logical and/or algorithmic basis of mathematics, or, in a broader sense, the mathematical investigation of what underlies the philosophical theories concerning the nature of mathematics. In this latter sense, the distinction between foundations of mathematics and philosophy of mathematics turns out to be quite vague.

Intellectual Autonomy: Having rational control of one's beliefs, values, and inferences, The ideal of critical thinking is to learn to think for oneself, to gain command over one's thought processes. It entails a commitment to analyzing and evaluating beliefs on the basis of reason and evidence, to question when it is rational to question, to believe when it is rational to believe, and to ...

The Origin of Selfhood: A Functionalist Account Based on the Predictive Processing Paradigm. Speaker: Zong Ning From: The University of Tokyo URL: Abstract: In this paper I examine the notion of selfhood through the lens of the predictive processing paradigm. I argue that an agent's individual existence is essentially associated with the reflexive capacity of information processing,
